ARTIFICIAL INTELLIGENCE

What Is AI and Why is it Valuable?

AI is a machine's ability to perform almost human cognitive functions

AI in HR

-  Decision support
-  Next level of Employee Self-Service
-  Chat bots at call centers instead of humans
-  Free HR staff from many repetitive tasks

EMPLOYEE ENGAGEMENT

Employee Engagement

- Pre-boarding
- Retention
- Social components
- Mobile

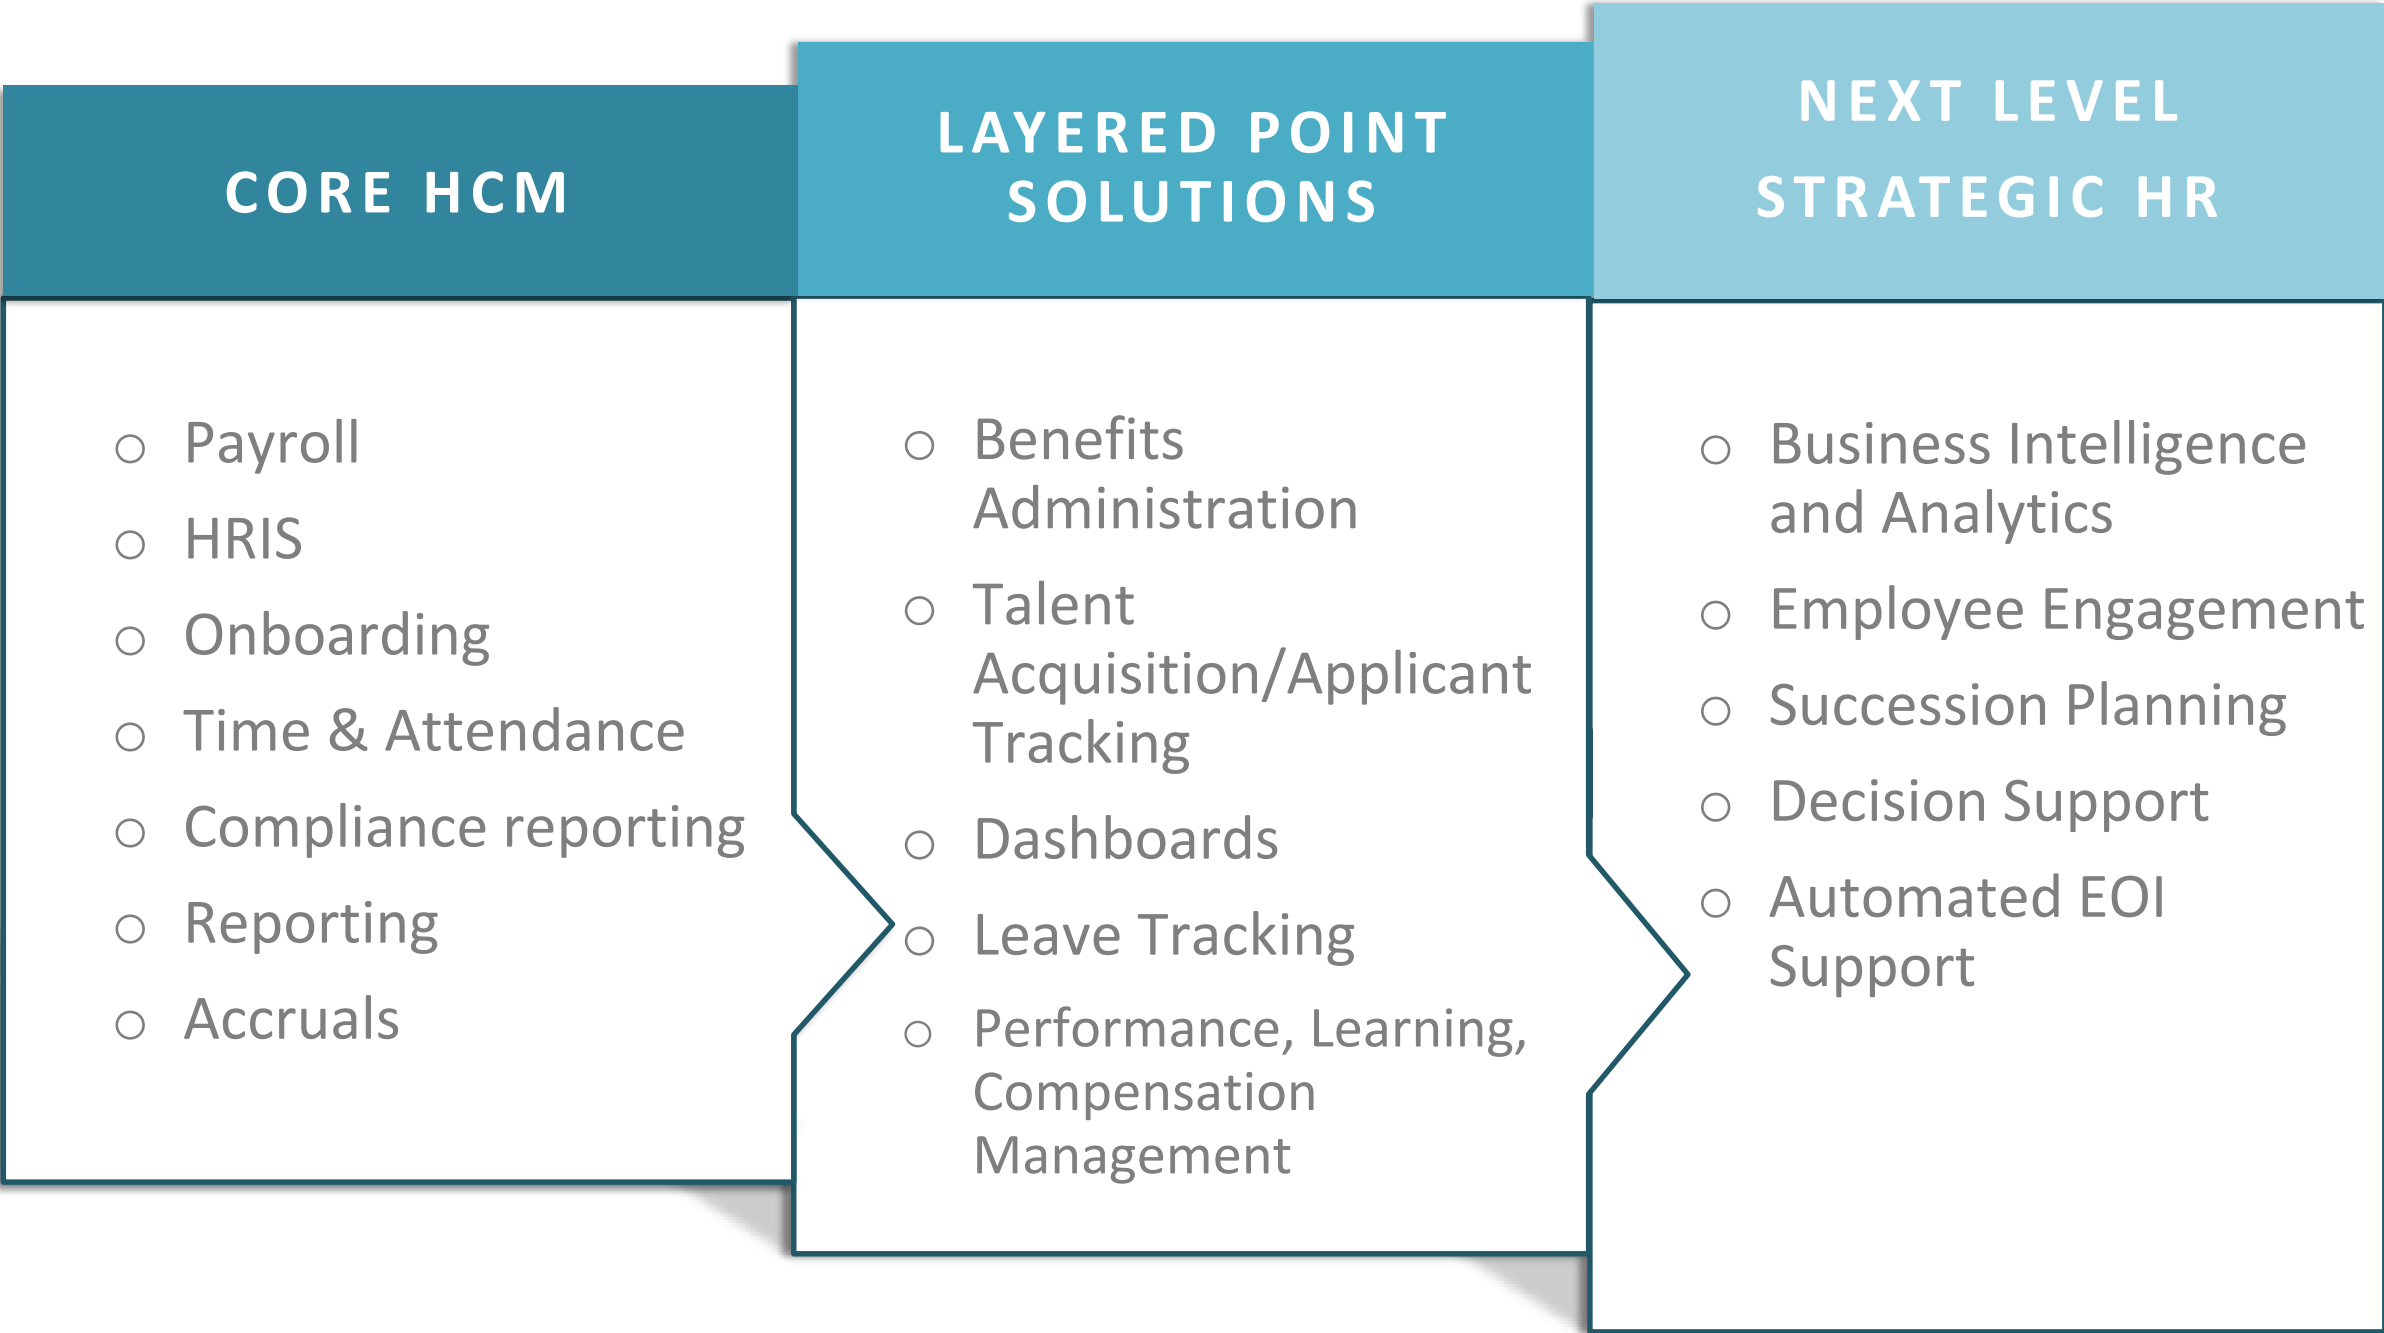

“Those organizations with ‘no plans’ to enable Mobile are twice as likely to have responded that their HR function has no credibility within the organization, while organizations with Mobile-enabled HR are three times more likely to be viewed as a strategic business partner.” (Sierra Cedar pg 94.)

LAYERING TECHNOLOGY

Layering Technology

**HR Tech Trends:
A Look Ahead...**

Blockchain

- Technology that powers Bitcoin and other crypto-currencies
- Decentralized, public database or ledger
- Every transaction creates a timestamped “block”, that cannot be modified, within the chain
